LLM Based Title Plant Coding Solution

LLM Based
Generative AI
Solution at
affordable per
document processed
based price
removing the
technological risk
from end-user

Title Plant Coding requires 'View and Type' from scanned images. The job needs to be done by "trained manpower" who can identify the information and code it with "accuracy" and "speed".

We developed a solution using LLM based Generative AI for a leading BPO in India whereby:

- Accuracy of single pass > 95% (better than human performance)
- Speed > 10 X of human speed

The solution has been integrated with the existing solution of customer so that the compare process can run seamlessly.
